OUR STRENGTH

AJEYA Aluminium System is a brand committed to delivering premium-quality aluminium doors and windows through complete in-house manufacturing. The company operates its own aluminum furnace and aluminum extrusion plant, ensuring precision, strength, and consistency in every profile. With a fully equipped testing lab, each product undergoes strict quality checks to meet industry standards. Advanced powder coating facilities provide long-lasting colour durability and flawless surface finishing. In addition, the brand's anodising unit enhances corrosion resistance and aesthetic appeal. By controlling every stage of production, AJEYA delivers superior, reliable, and performance-driven aluminium systems for modern architecture.
